

system X CERAMIC PROTECTION  
*Marine*

### The Most Trusted Name in Professional Coating Technologies

Whatever type of boat you own, it deserves nothing but the best.

That's why boating enthusiasts worldwide — including owners of the world's finest mega yachts — choose System X Marine Ceramic Protection from Element 119.

Quite simply, they trust System X to consistently provide unmatched paint protection, hardness, and brilliance. A paint-protection system that utilizes proprietary ceramic technologies, System X doesn't work merely as a layered application. Instead, it interlocks its molecular structure with the surface molecules of the paintwork to literally become the functional surface of the boat's paint and gelcoat.

The result is a semi-permanent ceramic coating that won't wash off like wax, polish, or sealant. System X exhibits outstanding resistance to friction, heat, pollutants and solvents — for a finish that locks in long-lasting beauty, as well as peace of mind.

# The *ULTIMATE* *PROTECTION* for Harsh Marine Environments

system X CERAMIC PROTECTION  
*Marine*

element  119

The marine environment is unforgiving. The high corrosiveness of salt, UV rays, acids, alkalis, exhaust and algae/shell contaminants can cause structural and cosmetic damage that impair your craft's performance and ruin its appearance.

A proprietary coating technology, System X Marine Ceramic Protection is designed to offer the ultimate paint protection for boats and water vessels of all kinds. Upon application you can have the utmost confidence that your vessels will be rendered virtually immune to the adverse weathering effects of both underwater and above-water environments, conditions, and elements.

- ▶ **UV RAY PROTECTION** System X Marine Ceramic Protection provides maximum UV ray protection for paint, gelcoat, and stainless steel to prevent unsightly damage associated with aging and fading colors.
- ▶ **A SHIELD AGAINST CORROSIVES** From salt and exhaust to oxidation and sea life contaminants, the marine environment is characterized by elements and processes that induce corrosion. System X Marine Ceramic Protection treats surfaces like metal and gelcoat with water-resistant properties that prevent spotting and make cleaning dirt and debris fast and easy.
- ▶ **HIGH GLOSS AND APPLICATION VERSATILITY** System X Protection is highly effective on a variety of surfaces. Imparting a high gloss and bringing out the full luster and sheen of your boat's finish. Through its hydrophobic properties you're assured cleaning can be done easily without the use of abrasive chemicals and detergents. Save time and preserve your vessel with System X Marine Protection.
- ▶ **HIGHEST DEGREE OF HARDNESS** System X Marine Ceramic Protection registers over 9H on the industry's hardness scale — equating to a coating hardness that provides an exceptional level of paint protection.

# RENEGADE

CERAMIC NANO COATING

Our premier marine coating, System X Renegade Ceramic Nano Coating, offers a full year of protection in the harshest water environments. It is a proven performer in the coating industry, having passed rigid Boeing approval testing and demonstrated temperature tolerances that exceed 1,000 degrees.

# XTREME

CERAMIC NANO COATING

Providing extreme hardness and resilience for boats and water vessels of all kinds, System X Xtreme Ceramic Nano Coating is our most effective coating for protecting against friction, heat, and solvents. Incorporating the industry's most durable ceramic technology, it offers years of protection against salt water, with no yellowing, cracking, peeling, or delaminating. In addition, System X Xtreme Ceramic Nano Coating withstands heat over 1,100 degrees, offers a high degree of resilience in punishing environments, and provides an extreme gloss finish.
